`int[]`

`float[]`

`boolean[]`

`color[]`

`char[]`

`String[]`

fibonacci 1, 1, 2, 3, 5, 8, 13, 21

```
int[] fibonacci    1, 1, 2, 3, 5, 8, 13, 21
```

```
int[] fibonacci = { 1, 1, 2, 3, 5, 8, 13, 21 };
```

int[]

Stores a list of integers

```
int[] fibonacci = { 1, 1, 2, 3, 5, 8, 13, 21 };
```

Or:

```
int[] fibonacci = new int[8]  
fibonacci[0] = 1;  
fibonacci[1] = 1;  
fibonacci[2] = 2;  
fibonacci[3] = 3;  
fibonacci[4] = 5;  
fibonacci[5] = 8;  
fibonacci[6] = 13;  
fibonacci[7] = 21;
```

String[]

Stores a list of strings

```
String[] participants = {  
    "Lauren",  
    "Thomas",  
    "Susana",  
    "Kees",  
    "Roosje",  
    "Adriaan",  
    "Britt",  
    "Rob",  
    "Dirk"  
};
```

Or:

```
String[] participants = new String[9];  
participants[0] = "Lauren";  
participants[1] = "Thomas";  
participants[2] = "Susana";  
participants[3] = "Kees";  
participants[4] = "Roosje";  
participants[5] = "Adriaan";  
participants[6] = "Britt";  
participants[7] = "Rob";  
participants[8] = "Dirk";
```
